

28th October 2022

Dear Esteemed Members

Very warm greetings from EFSI.

Renewal of Factory License for the year 2023 :

Many members have represented to us that the DISH department Server is not working properly to renew the license for the year 2023 and not permitting them to make online payment despite best efforts.

The subject matter was taken up by us with DISH to find out a solution to make payment of licence fee for renewal of licence on or before 31st Oct, 2022. In response to our request, they have sent the following message :

"As communicated earlier, the limitation in the old VM of TNSDC cloud server has led to the connectivity issues between Application and DB servers. Even though auto generation of licence is downloaded by many users, some of them face issues in online payment. The last minute rush of users has aggravated the issue. We are taking all our efforts to rectify the issue and couldn't achieve uniform connectivity.

As a measure to manage this last minute rush in the renewal process, the e-challan payment / Demand Draft for licence fees along with hardcopies of Form no 2, may be submitted in the respective Joint Directors. The payment should be made on or before 31.10.2022 and it should be submitted directly in the office along with Form 2, 3 copies duly signed before 5.45 P.M on 31.10.22. The license for such factories could be issued online and the procedure for such a process will be communicated later.

This is only an ad-hoc measure to avoid the penalty for late payment. At the same time, please encourage the occupier to apply through online mode as usual"

In view of the above, those members, who have not yet renewed the license/ not made payment through online, may adopt this measure suggested by DISH and ensure that the process of renewal is completed on or before 31st Oct, 2022.

Yours Sincerely,

With Warm Regards,

K Manickam
